Height-adjustability

USM Haller Table

USM Kitos (B3 column)

USM Haller Table

The rectangular USM Haller table, part of the standard system, can be adjusted to any height between 27 to 34 inches using a manual crank. Once easily inserted into one of the table legs, the crank lifts or lowers the tabletop to the desired height with precision.

USM Kitos (B3 column)

The USM Kitos B3 is equipped with an optimal height adjustability from 28 to 47 inches. It can be linked to other tables and the standard accessories can be added. Available in various surface options including wood veneer, plastic laminate and linoleum.

USM Kitos (C column)

USM Kitos round table (freestanding)

USM Kitos (C column)

The smart design of the three-part C column significantly enhances the height adjustability of this USM Kitos table, which can be converted from a seated to a standing workstation at the touch of a button. The table height is infinitely adjustable between 27 and 51 inches and with the easy-to-use control console, can be pre-programmed or selected manually. The electronic motor allows for quick adjustments. Even in its fully extended state, the stability of the table is exceptional. Height- and angle-adjustability specifications can be added prior to initial use or retrofitted afterward. With greater and faster height adjustability, this table is a crowning achievement of versatility.

USM Kitos (freestanding)

The USM Kitos freestanding table can be transformed from a seated table to a standing table in the blink of an eye, making it extremely well suited for meetings or quick gatherings. By pressing the manual handle on the outside edge of the table, the height can be adjusted anywhere from 27 to 43 inches. Available in a square or round shape with any of the wood veneers, plastic laminates and linoleum table surfaces.

The height-adjustable USM tables are available in various shapes and sizes. For detailed information visit our website.
